

Please do not allow BPL approval. Many public radio services will be affected. FEMA has asked to not approve this for the same reason I ask you not to. I am a member of ARES, RACES and SATERN. Given how often Amateur Radio is used by public agencies and the proof BPS causes interference to two-way radio operation, it is not in the public interest to allow BPL service.

Thank you.

Sincerely,  
Rory Griffin KA2TKS
